

# @anza

## Welcome to another edition of @anza!

It is so hard to believe another financial year is drawing to an end! And what a year it has been! As you're already aware, we have additional premises and launched our new web site!

We have also added a few additional faces! We welcome Teagan and Ashley to the sales team. We also have Jett. Jett is looking after all accounts payable and receivable. So should you have any questions about your account, please contact Jett on (07) 3852 5844 or [jett@anza.com.au](mailto:jett@anza.com.au)

Of course the old faces are still here, Greg, Tanya, Damien and Michelle. We are all available to assist with your telecommunication enquiry!!

## CONGRATULATIONS!!

In our last newsletter, we ran a competition to win a Nokia BH100 hands free Bluetooth. The following customers are our winners!! Nathan Drury, Martin Wilkinson, Chris Hoey, Graeme Lakey, Donna Lewis, Shane Hart, David Bedford, Ryan Rosenlund, Andrew Hill, Peter Arnold, Evan Fortune and Douglas Holt. Once again, congratulations to all our winners!

## How too?

ANZA Communications will be commencing a series of toolbox training sessions for our customers.

Our first session will be on Blackberry's. Please express your **interest via our home page**, and it would also be appreciated if you could include any specific items you would like covered!

Recession Buster  
Coming Soon!!!

# TURBO 21!!!

Back on 17 February 2009, Telstra announced the launch the world's first commercial 21Mbps capable mobile broadband device. This comes on the back of the December 2008 announcement of the upgrade to the Telstra Next G™ network, from 14Mbps to 21Mbps.

The Turbo 21 modem is the world's fastest commercially available wireless modem on the Next G™ network which has been upgraded with theoretical maximum downlink speeds of 21 Mbps in selected CBD, metropolitan and regional areas. This provides typical download speeds of 550 kbps to 8 Mbps in these areas. ^

With the Turbo 21 modem, businesses in upgraded areas could access information, collaborate in near real-time and view high definition information from multiple locations. The Turbo 21 will help turn downtime into productive time and offer your staff easy log-in to your virtual office. For instance:

- ✦ logistics companies could download large data files, such as high resolution blueprints and plans onsite in seconds
- ✦ creative firms can collaborate quickly between edit suites and production houses to speed up sign-off times
- ✦ health industries could download x-rays in seconds
- ✦ plumbers and similar trades can get work allocated through mobile devices
- ✦ teachers on field trips could view high definition video streaming, bringing the classroom to the field
- ✦ interstate based businesses could access higher-quality web conferencing at near real-time, reducing travel and associated costs

ANZA look forward to an opportunity to have a detailed discussion with you on how the Turbo 21 Modem on the world-class Next G™ network could help increase productivity, better manage or reduce costs in your business and simply, help you do business better.

*^ Actual speeds are less than 21Mbps and vary due to congestion, distance from the cell, local conditions, hardware, software, download source and other factors.*

## **CREDIT CARD SURCHARGE:**

A reminder that a 2% surcharge is payable on products when paying via credit card.

## **FREIGHT & COURIER:**

Back on the 1<sup>st</sup> August 2008, a notice was sent out advising that a freight charge was being introduced on all goods posted and couriered to our customers. The cost will be subject to location and urgency of the goods. We believe we have worked very hard in the past to keep this to a minimal cost, if not any cost at all.

**ANZA'S HERE TO HELP! !**  
*Complimentary bill appraisal to the First 20 customers.*

Can you answer these questions?

1. How much do you spend on calling mobiles from your office per month?
2. What percentage of these calls are to your staff mobiles compared to clients and suppliers?
3. How much do you spend calling the office from your company mobiles?

If you can not answer the above questions, maybe you would like to take advantage of a bill appraisal. At ANZA, we can answer all the above questions plus give you an accurate idea of the savings you could expect!

During these tougher economic times, we all could do with saving money. ANZA's experienced staff are striving to minimize our customer's phone bills. It could be as simple as an accessory added to an existing or new phone system. This accessory will reduce fixed line call expenses to calls made to mobile phones.
